## DETAILED ACTION

### *Claim Objections*

1. Claims 1-8 are objected to because of the following informalities: The term "characterized in that" should be changed to --comprising-- or --wherein--, so as to comply with accepted U.S. patent practice. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhang (US2002/132201), which shows all of the claimed limitations. Zhang shows a safety lighter including, among other things, safety and force saving lighter, comprising casing (3), gas valve assembly (see at least fig. 1) on top of casing, piezoelectric assembly (70) at one side of gas valve assembly and press trigger (1) on top of piezoelectric assembly, a crow plate (see at least fig. 1) causing both to act coordinately is set between the gas valve assembly and piezoelectric assembly, wherein a strengthener (12) is provided between piezoelectric assembly and press trigger, a slot with a push key (41) is set on the press trigger (see at least fig. 5), there is a reset spring/guide rib

(5,5') between push key and side wall of press trigger, a lobe (11,42) with stop block (61) is located at the bottom of push key which has a position corresponding to the top of strengthener.
